CONTENTS OF VOLUME 11

NUMBER 1–2

Environmental Geochemistry

Selected Papers from the 3rd International Symposium, Kraków, Poland, 12–16 September 1994

Editors: Ron Fuge, Mike Billett and Olle Selinus

E. HELIOS RYBICKA: Preface 1

E. HELIOS RYBICKA: Impact of mining and metallurgical industries on the environment in Poland 3

J. F. VERNER, M. H. RAMSEY, E. HELIOS-RYBICKA and B. JĘDRZEJCZYK: Heavy metal contamination of soils around a Pb–Zn smelter in Bukowno, Poland 11

J. RIEUWERTS and M. FARAGO: Heavy metal pollution in the vicinity of a secondary lead smelter in the Czech Republic 17

H. NISKAVAARA, C. REIMANN and V. CHEKUSHIN: Distribution and pathways of heavy metals and sulphur in the vicinity of the copper–nickel smelters in Nikel and Zapoljarnij, Kola Peninsula, Russia, as revealed by different sample media 25

A. KARCZEWSKA: Metal species distribution in top- and sub-soil in an area affected by copper smelter emissions 35

J. MASKALL, K. WHITEHEAD, C. GEE and I. THORNTON: Long-term migration of metals at historical smelting sites 43

M. C. JUNG and I. THORNTON: Heavy metal contamination of soils and plants in the vicinity of a lead–zinc mine, Korea 53

K. L. GOODYEAR, M. H. RAMSEY, I. THORNTON and M. S. ROSENBAUM: Source identification of Pb–Zn contamination in the Allen Basin, Cornwall, SW England 61

H.-T. CHON, C.-H. CHO, K.-W. KIM and H.-S. MOON: The occurrence and dispersion of potentially toxic elements in areas covered with black shales and slates in Korea 69

S. USTYAK and V. PETRIKOVA: Heavy metal pollution of soils and crops in Northern Bohemia 77

H. SMAL and M. MISZTAL: Soil solution chemistry in the profiles of forest and arable light textured soils, S.E. Poland 81

L.-O. LANG and R. L. STEVENS: Weathering variability and aluminium interlayering: clay mineralogy of podzol profiles in till and glaciofluvial deposits, S.W. Sweden 87

B. ÖHLANDER, M. LAND, J. INGRI and A. WIDERLUND: Mobility of rare earth elements during weathering of till in northern Sweden 93

N. BREWARD, M. WILLIAMS and D. BRADLEY: Comparison of alternative extraction methods for determining particulate metal fractionation in carbonate-rich Mediterranean soils .. 101

R. LĂCĂTUŞU, C. RĂUTĂ, S. CÂRSTEA and I. GHELASE: Soil–plant–man relationships in heavy metal polluted areas in Romania 105

P. F. RÖMKENS, J. BRIL and W. SALOMONS: Interaction between Ca^{2+} and dissolved organic carbon: implications for metal mobilization 109

T. Tarvainen, S. Aatos and M.-L. Räisänen: A method for determining the normative mineralogy of tills 117

B. Maliszewska-Kordybach: Polycyclic aromatic hydrocarbons in agricultural soils in Poland: preliminary proposals for criteria to evaluate the level of soil contamination .. 121

E. Paterson, M. Sanka and L. Clark: Urban soils as pollutant sinks—a case study from Aberdeen, Scotland 129

M. J. Wilson and N. Bell: Acid deposition and heavy metal mobilization 133

S. Mannings, S. Smith and J. N. B. Bell: Effect of acid deposition on soil acidification and metal mobilisation 139

T. Fumoto, H. Iwama and K. Banzai: Natively retained sulfate and its effect on the acid buffering capacity of Andosols 145

J. Matschullat and E. Bozau: Atmospheric element input in the Eastern Ore Mountains 149

E. Kubin and H. Lippo: Atmospheric heavy metal deposition in Finland from 1985 to 1990 155

W. H. O. Ernst: Bioavailability of heavy metals and decontamination of soils by plants 163

M. Lewander, M. Greger, L. Kautsky and E. Szarek: Macrophytes as indicators of bioavailable Cd, Pb and Zn flow in the river Przemsza, Katowice Region 169

T. Landberg and M. Greger: Differences in uptake and tolerance to heavy metals in *Salix* from unpolluted and polluted areas 175

M. Trafas: Changes in the properties of post-flotation wastes due to vegetation introduced during process of reclamation 181

D. Sear and S. Carver: The release and dispersal of Pb and Zn contaminated sediments within an Arctic braided river system 187

M. Wardas, L. Budek and E. Helios Rybicka: Variability of heavy metals content in bottom sediments of the Wilga River, a tributary of the Vistula River (Kraków area, Poland) 197

R. H. Parkman, C. D. Curtis, D. J. Vaughan and J. M. Charnock: Metal fixation and mobilisation in the sediments of the Afon Goch estuary—Dulas Bay, Anglesey 203

J. E. Rae and A. Parker: Techniques for validating the historic record of lake sediments. A demonstration of their use in the English Lake District 211

Z. Licheng and Z. Guijiu: The species and geochemical characteristics of heavy metals in the sediments of Kangjiaxi River in the Shuikoushan Mine Area, China 217

J. Leńczowska-Baranek: The Łączany Weir as a geochemical barrier in the migration of heavy metals 223

R. B. Herbert Jr: Metal retention by iron oxide precipitation from acidic ground water in Dalarna, Sweden 229

C. Wolkersdorfer: Hydrogeochemical investigations of an abandoned uranium mine in the Erzgebirge/Germany 237

G. E. M. Hall, G. F. Bonham-Carter, A. J. Horowitz, K. Lum, C. Lemieux, B. Quemerais and J. R. Garbarino: The effect of using different 0.45 μm filter membranes on 'dissolved' element concentrations in natural waters 243

O. Selinus: Large-scale monitoring in environmental geochemistry 251

M. Nikkarinen, E. Kauniskangas and K. Nenonen: Use of geological and geochemical data for the derivation of maps for environmental planning in Iisalmi, Finland 261

P. Edén and A. Björklund: Applicability of overbank sediment for environmental assessment according to wide-spaced sampling in Fennoscandia 271

R. Salminen and P. Sipilä: The environmental impact of sulphide mines measured with organogenic sampling media 277

D. G. Lumsdon: Modelling cadmium retention by soils and the effects of aluminium competition 285

Z. Lin and U. Qvarfort: A study of the Lilla Bredsjön tailings impoundment in mid-Sweden—a comparison of observations with RATAP model simulations 293

M. A. M. Kedziorek and A. C. M. Bourg: Acidification and solubilisation of heavy metals from single and dual-component model solids 299

E. V. Petrova, V. I. Sergeev and T. G. Shimko: Mathematical modelling of a migration process and forecasting solutions for 1-, 2-, 3-layer subsoil of the aeration zone 305

M. Meili and A. Wörman: Desorption and diffusion of episodic pollutants in sediments: a 3-phase model applied to Chernobyl ^{137}Cs 311

K. G. Stollenwerk: Simulation of phosphate transport in sewage-contaminated groundwater, Cape Cod, Massachusetts 317

D. C. Smith and M. V. Fey: Chemical manipulation of soil for sealing landfills 325

E. Filcheva, M. V. Cheshire, C. D. Campbell and D. B. McPhail: Effect of heavy metal contamination on the rate of decomposition of sewage sludge and microbial activity .. 331

J. Cotter-Howells and S. Caporn: Remediation of contaminated land by formation of heavy metal phosphates 335

A. Karczewska, T. Chodak and J. Kaszubkiewicz: The suitability of brown coal as a sorbent for heavy metals in polluted soils 343

M. A. Castelo Branco, M. E. Balsa, M. R. Gusmão, J. M. Vieira e Silva, M. L. Fernandes and E. M. Sequeira: Use of pyrite in the reclamation of degraded calcareous soils 347

P. Wyszomirski and E. Brylska: Fly ash in Polish building ceramics—threat or proecology? 351

I. Thornton: Impacts of mining on the environment; some local, regional and global issues 355

J. Kelly, I. Thornton and P. R. Simpson: Urban geochemistry: a study of the influence of anthropogenic activity on the heavy metal content of soils in traditionally industrial and non-industrial areas of Britain 363

H. Terelak, T. Motowicka-Terelak and T. Stuczyński: Direct and residual effects of sulphur pollution on the acidity of a loamy soil 371

E. Dinelli and A. Lombini: Metal distributions in plants growing on copper mine spoils in Northern Apennines (Italy): the evaluation of seasonal variations 375

NUMBER 3

Articles

P. VILKS and D. B. BACHINSKI: Characterization of organics in Whiteshell Research Area groundwater and the implications for radionuclide transport 387

S. I. DWORKIN and L. S. LAND: The origin of aqueous sulfate in Frio pore fluids and its implication for the origin of oil field brines 403

A. DAVIS, C. SELLSTONE, S. CLOUGH, R. BARRICK and B. YARE: Bioaccumulation of arsenic, chromium and lead in fish: constraints imposed by sediment geochemistry 409

G. S. SHELP, W. CHESWORTH and G. SPIERS: The amelioration of acid mine drainage by an in situ electrochemical method; part 2: employing aluminium and zinc as sacrificial anodes 425

C. LE GAL LA SALLE, C. MARLIN, S. SAVOYE and J.-C. FONTES: Geochemistry and ^{14}C dating of groundwaters from Jurassic aquifers of North Aquitaine Basin (France) 433

J. M. DEELY and D. S. SHEPPARD: Whangaehu River, New Zealand: geochemistry of a river discharging from an active crater lake 447

C. YONEZAWA, T. TANAKA and H. KAMIOKA: Water–rock reactions during gamma-ray irradiation .. 461

N. C. STURCHIO, G. B. AREHART, M. SULTAN, Y. SANO, Y. ABOKAMAR and M. SAYED: Composition and origin of thermal waters in the Gulf of Suez area, Egypt 471

Y. ZHU, Y. ZENG and Y. AI: Experimental evidence for a relationship between liquid immiscibility and ore-formation in felsic magmas 481

Book Reviews

O. SELINUS: Handbook of Exploration Geochemistry, Volume 6. Drainage Geochemistry 489

C. A. J. APPELO: Contamination of Groundwaters 491

J. G. FARMER: Arsenic Exposure and Health 492

A. GIZE: The Role of Nonliving Organic Matter in the Earth's Carbon Cycle 494

IAGC application form I

NUMBER 4

Articles

C.-Y. KING, B.-S. KING, W. C. EVANS and W. ZHANG: Spatial radon anomalies on active faults in California 497

G. I. COOPER and G. A. COX: The aqueous corrosion of potash–lime–silica glass in the range 10–250°C 511

J. A. SCHRAMKE, E. M. MURPHY and B. D. WOOD: The use of geochemical mass-balance and mixing models to determine groundwater sources 523

M. LEBLANC, B. ACHARD, D. B. OTHMAN, J. M. LUCK, J. BERTRAND-SARFATI and J. CH. PERSONNÉ: Accumulation of arsenic from acidic mine waters by ferruginous bacterial accretions (stromatolites) 541

K. V. TICKNOR, P. VILKS and T. T. VANDERGRAAF: The effect of fulvic acid on the sorption of actinides and fission products on granite and selected minerals 555

Y. Sun and W. Püttmann: Relationship between metal enrichment and organic composition in Kupferschiefer hosting structure-controlled mineralization from Oberkatz Schwelle, Germany.... 567

E. Caballero, C. Jiménez de Cisneros and E. Reyes: A stable isotope study of cave seepage waters 583

J. Wauters, A. Elsen, A. Cremers, A. V. Konoplev, A. A. Bulgakov, R. N. J. Comans: Prediction of solid/liquid distribution coefficients of radiocaesium in soils and sediments. Part one: a simplified procedure for the solid phase characterisation..... 589

J. Wauters, M. Vidal, A. Elsen and A. Cremers: Prediction of solid/liquid distribution coefficients of radiocaesium in soils and sediments. Part two: a new procedure for solid phase speciation of radiocaesium 595

J. Wauters, A. Elsen and A. Cremers: Prediction of solid/liquid distribution coefficients of radiocaesium in soils and sediments. Part three: a quantitative test of a K_D predictive equation.. 601

J. L. Mogollón, C. Bifano and B. E. Davies: Geochemistry and anthropogenic inputs of metals in a tropical lake in Venezuela 605

Book Reviews

D. A. C. Manning: The Geochemistry of Reservoirs..... 617

G. H. Brown: Solute Modelling in Catchment Systems..... 619

IAGC application form: I

NUMBER 5

Articles

P. R. Simpson, N. Breward, D. M. A. Flight, T. R. Lister, J. M. Cook, B. Smith and G. E. M. Hall: High resolution regional hydrogeochemical baseline mapping of stream water of Wales, the Welsh borders and West Midlands region 621

D. E. Voigt, S. L. Brantley and R. J.-C. Hennet: Chemical fixation of arsenic in contaminated soils 633

A. A. Sturz, A. E. Sturdivant, R. N. Leif, B. R. T. Simoneit and J. M. Gieskes: Evidence for retrograde hydrothermal reactions in near surface sediments of Guaymas Basin, Gulf of California 645

J. A. Saunders and R. C. Thomas: Origin of 'exotic' minerals in Mississippi salt dome cap rocks: results of reaction-path modeling 667

C. Degueldre, H.-R. Pfeiffer, W. Alexander, B. Wernli and R. Bruetsch: Colloidal properties in granitic groundwater systems. I: Sampling and characterisation 677

C. Degueldre, R. Grauer, A. Laube, A. Oess and H. Silby: Colloidal properties in granitic groundwater systems. II: Stability and transport study 697

M. Ergin, A. Gaines, G. C. Galletti, G. Chiavari, D. Fabbri and F. Yücesoy-Eryilmaz: Early diagenesis of organic matter in recent Black Sea sediments: characterization and source assessment 711

A. Simonetti, K. Bell and G. E. M. Hall: Pb isotopic ratios and elemental abundances for selective leachates from near-surface till: implications for mineral exploration..... 721

IAGC application form..... I

NUMBER 6

Articles

J. B. FEIN: The effect of aqueous metal–chlorophenolate complexation on contaminant transport in groundwater systems 735

D. C. ETTNER, S. LINDBLOM and D. KARLSEN: Identification and implications of light hydrocarbon fluid inclusions from the Proterozoic Bidjovagge gold–copper deposit, Finnmark, Norway 745

G. MICHARD, F. J. PEARSON JR. and A. GAUTSCHI: Chemical evolution of waters during long term interaction with granitic rocks in northern Switzerland 757

N. KIRATLI and M. ERGIN: Partitioning of heavy metals in surface Black Sea sediments 775

B. HITCHON: Rapid evaluation of the hydrochemistry of a sedimentary basin using only 'standard' formation water analyses: example from the Canadian portion of the Williston Basin 789

Y. K. KHARAKA, G. AMBATS, T. S. PRESSER and R. A. DAVIS: Removal of selenium from contaminated agricultural drainage water by nanofiltration membranes 797

E. J. MANTEI, M. GUTIERREZ and Y.-D. ZHOU: Use of normalized metal concentrations in the Mn oxides/hydrous oxides extraction phase of stream sediments to enhance the difference between a landfill emission plume and background 803

F. CZECHOWSKI, B. R. T. SIMONEIT, M. SACHANBIŃSKI, J. CHOJCAN and S. WOŁOWIEC: Physicochemical structural characterization of ambers from deposits in Poland 811

M. E. HODSON, S. J. LANGAN and M. J. WILSON: A sensitivity analysis of the PROFILE model in relation to the calculation of soil weathering rates 835

J. M. BIGHAM, U. SCHWERTMANN and G. PFAB: Influence of pH on mineral speciation in a bioreactor simulating acid mine drainage 845

IAGC application form I
